

The secret to silky-soft skin...

If there's one results-driven beauty treatment you have to spoil yourself with this month, it's The Laser Beautique's new Cinderella facial. We're crazy about this highly effective treatment, which uses Near Infrared (NIR) technology to heat the tissue under the skin's surface and boost collagen production and re-knit elastin fibres. Think gorgeously radiant and silky-soft skin – visible instantly. This luxurious facial isn't painful, doesn't require any downtime and includes a relaxing massage, revitalising mask and treatment with various lotions and potions from the reputable RégimA or Nimue skincare ranges. Pure bliss! Details: 0861-850-851; www.thelaserbeautique.co.za.
